**EC Embargo Russian Federation
HOMA Auto-coupling kits**

Dear Mr. Egorov,

The European Community imposed an Embargo for exporting goods for the use in the oil & gas industry into the Russian Federation.

Even though the HOMA auto-coupling kits KK, KS, etc. are not specifically used in this industry they are affected from this Embargo since they are listed in the customs tariff number 84138200 which mainly contains goods for the oil & gas industry.

HOMA right now is in contact with the Bundesausfuhramt (Federal Export Bureau) proving that the auto-coupling kits should not be subject of this Embargo.

As soon as this procedure is finished HOMA will receive a certificate of exemption enabling us to export auto-coupling kits again.

We expect this application process to be finished within the next week allowing us to return to normal business.

Yours sincerely

HOMA Pumpenfabrik GmbH
Neunkirchen-Seelscheid

i.A. Ralf Motz
(Export Manager)
